TECHNOLOGY STACK

SQL: HiveQL, Greenplum/Postgres, PL/SQL

Python: pandas, numpy, sklearn, statsmodels, Prophet, mlxtend

BI: Tableau, Qlik Sense, Excel

Workflow: Miro/Unidraw, PowerPoint; Jira, Yandex Tracker, Git (basic), Docker (basic), Bash (basic)

AI tools: Codex, Claude

ANALYTICAL FOCUS AREAS

- Customer data analysis
- Retail operations data analysis (sales, logistics)
- Causal analysis, decomposition, anomaly detection, and optimization opportunities

EDUCATION

PhD preparation - 2023-present

Publications: <https://orcid.org/0009-0003-4219-0287>

HSE University - 2021-2023

MSc: Applied Statistics with Network Analysis Methods

RANEPA - 2015-2019

Economics of Enterprises and Organizations

LANGUAGES

English: Upper-Intermediate

French: Basic

ABOUT ME

I work with business data analysis, BI tools, and statistical analysis, gradually shifting my focus toward operations research as a foundation for modeling and improving real decision-making systems.

During my master's studies, I researched recommender systems.

My professional interests are connected with managing and optimizing stochastic environments: customer behavior, adaptive demand, promotional activities, and decision-making under uncertainty and limited resources.

Some of my research results are available at <https://orcid.org/0009-0003-4219-0287>

I also work on a pet project: a BI system for customer analytics inspired by the technical limitations of existing solutions for complex calculations on large datasets.

EXPERIENCE AND EXPERTISE

Retail Services - Senior Analyst Developer - 02.2023-present

Focus: SQL/Python analysis of data models, root-cause analysis of incidents, data usage scenarios, dashboard and metric design for internal technical monitoring.

X5 Group - Perekrestok retail chain - Business Analyst - 03.2022-01.2023

Focus: analysis and optimization of in-store processes, resource demand forecasting, pilot evaluation, HR analytics, and validation of dashboard codebase correctness.

X5 Group - Ready-to-Eat Business Unit - Marketing Analyst - 01.2021-03.2022

Focus: evaluation of marketing and promotional activities, insights from receipt and loyalty program data, financial reporting, store and customer segmentation, pricing, and calculation of customer and product metrics.

Henkel (NRM department) - Junior Financial Reporting Specialist - 10.2019-01.2021

Focus: ad-hoc and P&L analytics, Excel dashboard development, analytical materials, and corporate presentations in Russian and English.
